North Road Sign Awards Evening  
Town Map

## Total Security Management – Building Safer Communities

### Town Cameras and Activity –

#### Bill Frost

The number of reported incidents within the CBD and areas with camera coverage remain at lows with few events on record over the past month. Of the events reported, in most cases good image intelligence was recorded and passed onto the Police for follow up. These incidents covered a range of diversity and not exclusive to protecting commercial interest, but all users of our common areas.

Those I have spoken to, feel free to traverse Kaitaia without concerns for their safety. It never fails to amaze me of the amount of unseen activities involve this camera network or ways it benefits our community. All of which assists in making our community a safe and enjoyable place to be.

Many new cameras and locations have been connected to the system at the Police station as the coverage increases to include some Schools and new roads. I am sure they will become quite useful as deterrents. Ideally by education we can continue this dramatic reduction on CBD crimes without the need to have people arrested and loses already incurred. Rather share information as education and stop the incident before it happens. It's just a better social outcome for everyone.

A new reporting program has been introduced to our operations and it has the capabilities to provide some very useful reporting statistics as time goes by.

Please continue to remember that as members of the KBA, you all contribute to the success of the project. We at Building Safer Communities thank you all.
